

Give us your ideas to help the NHS and support your Practice!

Challenge is nothing new to the NHS. It's faced and met challenges throughout its entire history. But we all know the NHS currently faces unprecedented challenges.

As a GP-led organisation, we know there are hundreds if not thousands of great ideas out there in Primary Care to help us meet these challenges.

It could be an idea for improving quality of care. Or an idea to improve efficiency or save money.

Or an idea to improve the compassion with which patients and their families and carers are treated.

Or it could be an idea for how best, as a Federation, we can support you and your Practice.

Whatever the idea and whoever you are, we want to hear from you.

We will highlight the best examples we receive and, where possible and practical, look to to introduce your ideas to make a real difference to care in our area.

To give us your idea, post or fax an Ideas Form to us
or fill in our Online Ideas Form at
