

# Primary Care Exchange

## What is Primary Care Exchange?

### A POSITIVE, LOW-COST RECRUITMENT SOLUTION

Primary Care Exchange is a bespoke software platform co-developed by doctors to replace the need for expensive third-party agencies, putting high-quality staff directly in touch with care providers in their local area.

Our franchised, area-based model ensures those seeking work see only exactly what they're looking for, while employers get instant access to a pool of proven staff already suitable for the work.

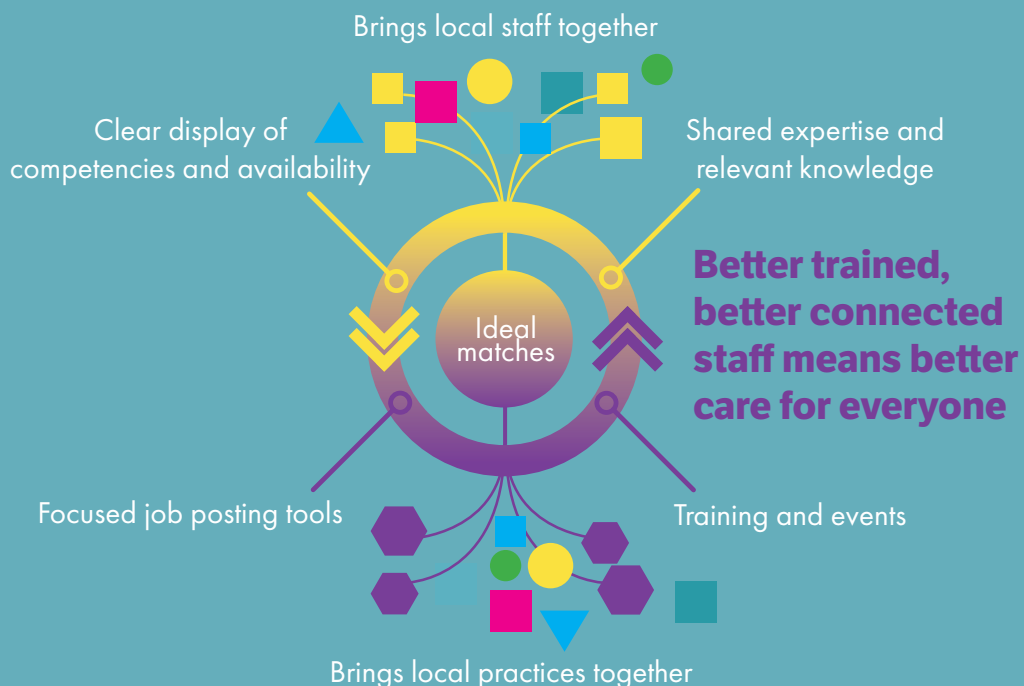

### A PLACE TO GROW

Each Primary Care Exchange franchise invites educational providers and local practices to post training and social events for members, helping to promote learning and strengthening ties in the region. Our system also allows both provider and recipient to filter by interest – far more personal than a noticeboard full of flyers. And with integrated calendars, maps and email reminders, our members need never worry about missing out on valuable resources again.

### A WAY TO COMMUNICATE

With its comprehensive forums and messaging system, Primary Care Exchange also offers a safe, welcoming community for its members. If you want to forge links, share tidbits of local knowledge or just arrange bookings and other details directly, our in-built messaging system makes this simple. It's just another way that Primary Care Exchange helps to nurture each local group of medical professionals and build a stronger NHS.

## How PCE nurtures a community

# Key features for job seekers

## SHARED CALENDAR

At the heart of your home page is a simple calendar that helps you see at a glance when work and training events are available. It's perfect for picking up extra shifts on the days that suit you, and for staying connected to the wealth of opportunities that a Primary Care Exchange membership provides.

## FILTERED VACANCIES

By its very nature, your local Primary Care Exchange portal is pre-filtered to suit your geographical location, but our selection tools help you target vacancies that precisely match the kind of work you're seeking. And with one-click contact options on every job post, there's no time wasted between finding suitable work and applying for it.

## EMAIL UPDATES

Once you've set up an account, we'll use your preferences to send you email bundles full of new vacancies, events and any notifications you need to see as frequently, or infrequently, as you'd like. It takes the hassle out of staying up to date with the job market.

## A REPRESENTATIVE ONLINE PROFILE

Add your competencies to help employers know what you offer. And with a simple system for tracking your history with PCE practices, your experience will speak for itself before you even write a word.

## TAKE IT ANYWHERE

Primary Care Exchange is built to be responsive, so whether you're accessing it through your mobile or desktop browser, you're sure to get the same high-quality user experience.

# Key features for practices

## FILTERED APPLICANTS

Primary Care Exchange has been built to suit your local area, putting you in touch with more suitable applicants straight away. Thanks to a simple work history tracking scheme, an established PCE franchise will also be able to offer you a list of confirmed experience for each job seeker too, helping provide confidence in each potential hire.

## NHS-SAVVY TOOLS

Serious care has gone into making Primary Care Exchange's suite of job posting tools suit medical professionals and save busywork. Got a collection of locum dates to fill? There's no need to type up each one; just write the description and use our simple date picker to post a batch of vacancies at once. Need a post filled urgently? We have a priority system to get that in front of our members' eyes fast.

## LOW-HASSLE RECRUITING

Primary Care Exchange is full of ways to ease the admin burden of recruitment. Why type out point-of-contact details every time when you can save your frequently used ones to an address book? Why write up the same details over and over when you could just set up a repeatable template? In other words, who wants to be doing busywork when there's more than enough to keep you busy as it is?

## LOW COST

Our pricing structures vary by franchise, so contact your local one to discover exactly how little access to everything PCE has to offer will set you back. But with prices as low as £1 per 1000 patients served, we hope you can clearly see the cost benefits when compared to other modern methods of recruitment.

# Who are Applied Healthcare Solutions?

Founded in 2010, Applied Healthcare Solutions has already had celebrated career in creating medical software. Our Clinical Guardian and Educational Guardian governance tools are used by care organisations across the UK, tracking hundreds of thousands of cases. Primary Care Exchange is the latest addition to that family, and will continue to grow as we work with new partners and listen to their needs.

## CONTACT US

To find out more about any of our software solutions, please email [info@appliedhealthcaresolutions.co.uk](mailto:info@appliedhealthcaresolutions.co.uk) or call 01225 667 150 during standard GMT office hours.

Alternatively, you can look us up online by pointing a web browser to [www.appliedhealthcaresolutions.co.uk](http://www.appliedhealthcaresolutions.co.uk).
